- Click in **add New >Upload trend-news.zip file > Install Now**
- **Activate the theme**

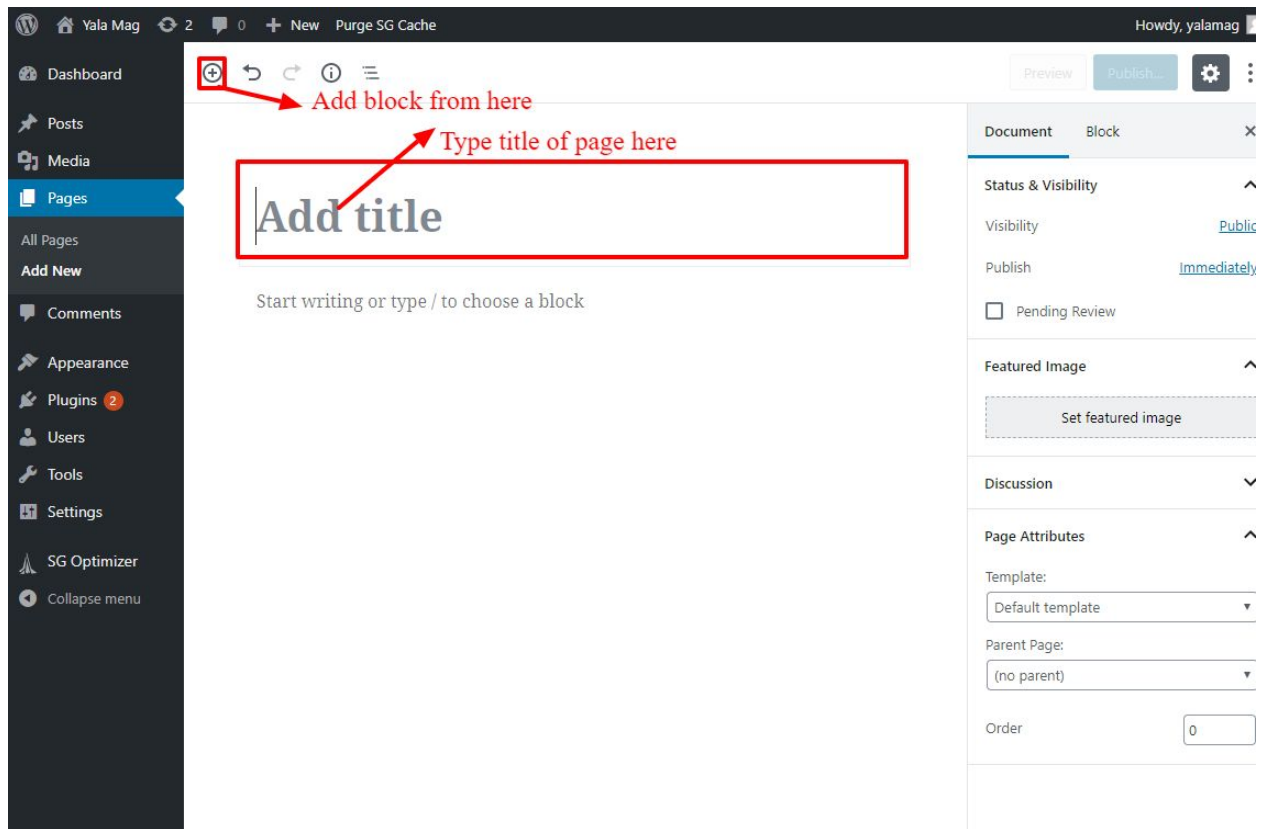

After installing the theme, now you can customize your website as per your preference.

2 –What is a page and how to create it?

Pages are static and are not listed by date. Pages do not use tags or categories. An about page is the classic example. Pages can be displayed in the sidebar using the Pages widget, and some themes display pages in the navigation at the top of the site.

-To create page

- Go to dashboard
- Click in **pages > Add New > Follow instructions as below**

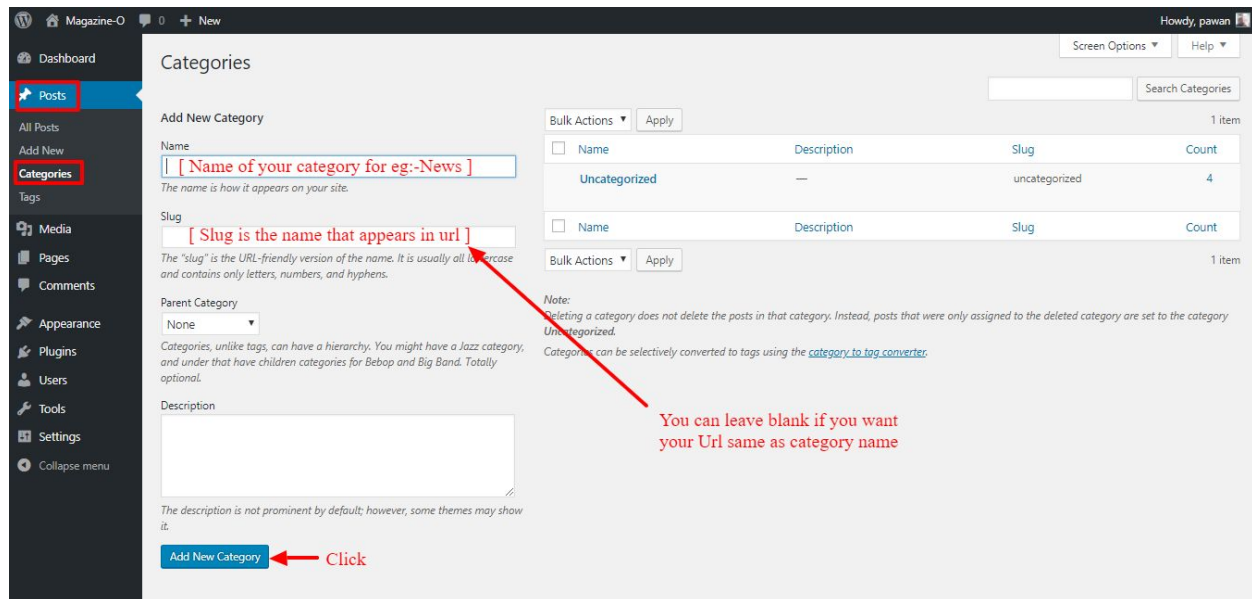

- After adding all content, you can publish your page and create necessary pages by the same method.

3 – What is the category and how to create it?

Categories provide a helpful way to group related posts together, and to quickly tell readers what a post is about. Categories also make it easier for people to find your content. Categories are similar to, but broader than, tags.

How to create categories

- Go to dashboard
- Click in **Posts > Categories**

- You can put your own slug too, most of the time it is left blank which means the name of the category itself will be its slug.
- [For eg. `yoursite.com/category/category_name`]
- You can put a description if you want.
- Now after adding the category, your category will appear on the right side of the post page.
- You can add more categories in the same manner.

4 – How to set up a static front page in WordPress?

In order to create a magazine like front page like shown in the theme demos for **Trend News**,

- First to create a new page named Home(or else) .
- Select Homepage template for your just newly created page under Page Attributes on the right side.
- Finally, publish this page.
